Allen W. Dulles, Esq.
48 Wall Street
New York City

Dear Allen:

Referred to Mr. Bross
I hand you herewith excerpts from the Eberstadt Report relating to Intelligence. This copy was actually made in Bob Blum's office in Washington.

I cannot find that the problem which we discussed on the telephone receives explicit consideration in the report. However, the passages which I have marked on pages 12, 13, 23, 24, 25, 30 and 31 appear to me at least to indicate that the Committee considered a certain degree of autonomy in certain fields not only inevitable but desirable. You will note also on page 25 a statement that "The Dulles study will undoubtedly make more detailed recommendations for internal reform".

I should be most interested sometime to learn at least the substance of your recommendations although I can appreciate that you probably would not want to discuss them before they are officially submitted.

Sincerely yours,

Enclosure

John A. Bross
